Dr. Joshua Lederberg
Department of Genetics
Stanford University Medical School
Palo Alto, California

Dear Dr. Lederberg:

First of all, I wish to tell you how much I enjoyed the opportunity of meeting with you and discussing problems related to the nervous system.

I am at present in the process of writing an article for Science on our work and I should like to quote the short essay you kindly gave me on Eugenics and Euphenics. In the pamphlet it is mentioned that the essay represents the "substance of a contribution to the Ciba Foundation Symposium, November, 1962, abbreviated for submission to Nature." I wonder if it is at present already in print in Nature and if you have any other article on this matter which I could read. Under separate cover I am sending you some of our recent work dealing with the Nerve Growth Factor. *

Most cordial greetings.

Sincerely,

Rita Levi-Montalcini

*Issue of
May 4, 1963.*

Is there any more to say?

*Enclosed something
close to the full
paper to be published
in the symposium.
Cordially, Julia.*
